

IMPACT ELP LED BEACON

- Only 58mm High
- EC65 approved
- Choice of mounts
- Synchronise facility for multiple units
- Cruise function

The Impact ELP low profile beacon LED uses 8 x 3W LED's, coupled with highly effective optic lenses produce a powerful light output. It has EC65 approval in both blue and amber versions. The EC65 approval includes rotating patterns as required for some countries. 25 flash patterns are incorporated as standard, the inbuilt flasher operates from a 10 - 40V supply range (suitable for 12 or 24V use).

The ELP beacon also has synchronisation and night dim functions along with a cruise function, this allows the light to be constantly lit (instead of flashing) at low power. When the unit is operating in cruise mode, activating flash mode overrides cruise mode and restores full power flashing. Impact ELP is available in permanent, magnetic, DIN and pole mount versions.

Dimensions (mm): H58 x Dia 106 (Lens) / 134 (Base)	
Order Code	Description
3-3751-EA	Permanent mount EC65 Amber class 1 10-40v
3-3751-EB	Permanent mount EC65 Blue class 2 10-40v
3-3751-G	Permanent mount Green 10-40v
3-3751-R	Permanent mount Red 10-40v
3-3751-W	Permanent mount White 10-40v
3-3751-x-D	DIN mount -
3-3751-x-P	Pole mount - all colours
3-3751-x-M	Magnetic mount: 34kg + full moulded rubber base cover + coil lead c/w switched fused plug - all colours
3-3751-x-M2	Magnetic mount: 34kg + full moulded rubber base cover + straight lead c/w double switched fused plug - all colours
4-750-xx	Pole Mounted Impact ELP beacon c/w pole
Replace x in above part numbers with code for desired colour. EA = Amber, EB = Blue, G = Green, R = Red, W = White
