

## TECHNICAL SPECIFICATIONS

Item	091401
Voltage	DC 10-33V
Max Power	30W
Frequency	200-1600HZ
Sound Distortion	≤5%
Sound Intensity	≥110dB
Siren Tones	30
Certification	ECER10

## FEATURES

- 10-33V multi-voltage input, multiple speakers work synchronously to improve the sound intensity and a function to decrease the volume at night, meet requirements for sound output;
- An output integration of amplifier, speaker and lighting control, compact design for simple installation and space saving;
- 30 programmable siren tones for versatile needs in different regions and industries.
- Supports external microphones (optional)
- Supports up to 8amp warning light, the external warning light operates synchronously with the siren.
- A separate input control line allows individual on/off control over the warning light.

## WIRING

Note: There are no pre-set tones

WARNING!

Do not connect GRN/WHI wire to the positive terminal of the battery.

## DIMENSIONS

## MOUNT
